TOYOTA TECHNICAL EDUCATION PROGRAM

JUMP START YOUR CAREER AS A TOYOTA TECHNICIAN

The gateway to becoming successful in a rapidly changing high-tech automotive industry is education! Jump-start your career as an automotive technician through the Toyota-Technical Education Program (T-TEP)!

Gain access to unimagined opportunities in the automotive service and repair field.

PROGRAM BENEFITS

- A \$2,000 tool bonus is provided after graduation, following one year of employment and a positive manager evaluation.
- Access to manufacturer training, online and instructor-led courses expanding your technical knowledge even further. You will graduate certified in at least one area.
- On the job training by shadowing another technician to prepare yourself for post-graduation career.

The T-TEP began in 1992 in partnership with Honolulu Community College's Automotive Technology Program. The T-TEP program assists top candidates by offering scholarships and employment opportunities to selected students while earning their Associates Degree in Automotive Technology.

As a T-TEP Apprentice Technician, students will have the opportunity to apply newly learned skills from school on Toyota simulators and vehicles. T-TEP students will also have the opportunity to attend technical training seminars with full-time Toyota technicians, and gain Toyota Technician credits recognized by any Toyota Dealer.

To plan for a future in a constantly changing automotive industry, enroll in Honolulu Community College, Leeward Community College, Maui Community College, or Kaua'i Community College's Automotive Technology Associate Degree Program, in pursuit of scholarship and employment opportunities with Toyota offered through the T-TEP program.

HOW DO I APPLY?

To apply for the T-TEP, you must meet the following requirements:

- Be a current Honolulu Community College, Leeward Community College, Maui Community College or Kaua'i Community College student pursuing an AS degree in Automotive Technology.
- You must have completed at least one semester in the Automotive Technology AS degree program and have at least one semester remaining in addition to the current semester before graduating.
- Have a minimum cumulative GPA of 3.0. (Cumulative GPA applies to all courses required in the AS Degree Program.)

If you meet the minimum qualifications, simply complete the T-TEP scholarship application form and submit it by the deadline stated on the T-TEP scholarship application.

HOW ARE THE RECIPIENTS SELECTED?

Applicants meeting the minimum requirements will take a written mechanical aptitude test. Based on the top test scores, finalists will be interviewed by the selection committee composed of representatives from Servco and either Honolulu Community College, Leeward Community College, Maui Community College, or Kaua'i Community College.

Scholarship recipients will also be asked to:

- Complete a Servco employment application (this is done online)

Upon receiving a job offer from Servco, the scholarship recipient will be asked to:

- Submit a current satisfactory traffic abstract.
- Successfully pass a drug test and physical examination.
- Successfully pass a criminal check.
- Successfully pass the education and employment verification process.

I wouldn't be where I am today without Servco and the Toyota Technician Education Program. The automotive technology field is an extremely fast-paced industry. It requires technicians to constantly improve their knowledge through training and education. The Toyota Technical Education Program has provided me with the skills and the training needed to become a confident technician for the past 23 years, starting as a beginner technician to a lead technician. Currently, I am a Field Technical Specialist which is more of a technical support role for our highly trained Servco technicians. This new position allows me to help assist, and to pass on the knowledge I have obtained over the years to the next generation.

Together, Servco and the Toyota Technical Education Program will provide you with all the tools needed to become successful in the automotive industry.
